SUMMARY

GTM engineer and growth marketing leader with 7.5+ years scaling enterprise B2B SaaS revenue. I build the AI-powered systems behind pipeline: multi-agent outbound infrastructure, automated account research, CRM enrichment pipelines, and full-funnel ABM programs targeting \$2B–\$20B enterprise accounts. Recent work: a 12-agent outbound suite that cut content effort 70%, an account-research workflow that compressed 20-hour research cycles to under 2 minutes, and an AI growth stack that delivered 3× team productivity while growing pipeline 30%. Comfortable owning strategy and building the automation myself — Clay, Apollo, n8n, Zapier, Gemini, and LLM orchestration.

SELECTED AI GTM SYSTEMS (BUILT & SHIPPED)

- **Account Research Agent** — Gemini + NotebookLM workflow automating enterprise account profiling; 600× faster than manual research (20 hrs → <2 min), enabling same-day personalized outreach.
- **12-Vertical Outbound Agent Suite** — custom AI agents mapped to ICPs, verticals, and regions for personalized multi-channel outreach at scale; 70% reduction in content production effort.
- **CRM Enrichment Pipeline** — n8n + Apollo + Zoho CRM automation eliminating manual data entry; 80%+ reduction in CRM hygiene effort.
- **Competitive Intelligence Agent** — real-time market-tracking bot feeding dynamic battle cards and live talk tracks to reps during active deals; 80% cut in deal-prep time.
- **GTM AI Stack** — end-to-end AI-first stack across campaigns, email outreach, lead gen, ads, and collateral; 3× productivity uplift, ~30% lower operating cost.
